

Diversified Risk Parity Portfolio

September-30-2010

Multi-strategy, multi-manager, diversified exposure to global financial markets

Investment Highlights

- » The DRP¹ strategy offers exposure to the alternative investment space with lower risk and less volatility than most traditional equity investment returns.
- » Over time, alternative investments have produced returns that are significantly less correlated to traditional investments. This is particularly beneficial in down markets.
- » The goal of the Diversified Risk Parity Portfolio is to seek to compound returns as frequently as possible.

Diversified Risk Parity Portfolio

September-30-2010

Manager's Commentary

Hedge fund strategies produced solid profits in September. DRP posted a gain of 1.71% in the month of September on the back of the Fed's willingness to maintain its Quantitative Easing policy. Asset classes that traditionally move inversely all moved in tandem – Equity, fixed income, and the price of gold. We believe this Government intervention will continue to distort natural market activity for the foreseeable future. Our bias in this environment has been to maintain a watchful eye on risk premia and constrain strategies that have exposure to common risk factors (stocks, bonds, interest rates) to lower levels.

Our event driven and metals positions were the largest contributors to performance in September. Our Long Short book was led by our energy positions as anything tied to the price of oil gained. We continue to focus on our dispersion call from January and feel our focus on skillful security selection will pay off as balance sheets come under scrutiny.

One area you will see the Diversified Risk Parity portfolio start to ease into is the higher velocity trading strategies currently being vacated by the banks proprietary trading desks. Banks "prop" desks were the biggest competitors to this group and we feel the reduced competition will offer good risk adjusted returns from hedge fund strategies who can take advantage of this reduced competition. We feel we are well positioned and expect that to improve over the next few months. We also feel the hedge funds space is better positioned for this asset class as they are incentivized to compound each year through their incentive fee structure which carries a hurdle rate, and because they typically have a good portion of their own net worth at risk (unlike the traders on a bank prop desk).

As always, please do not hesitate to call with any questions. (512) 327-6000

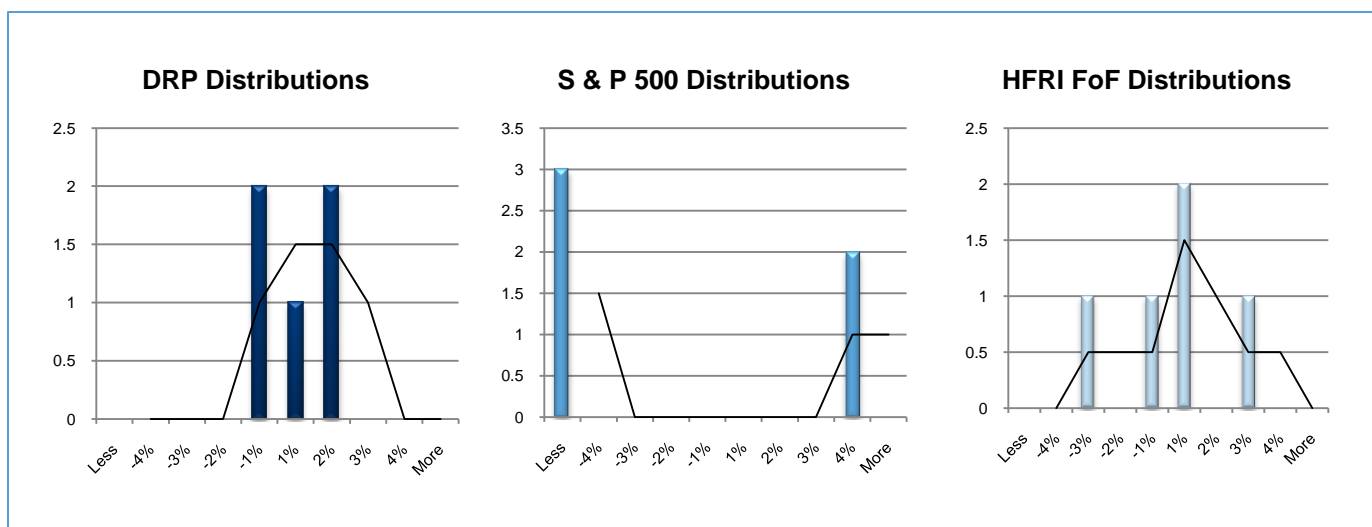

DRP Strategy Development

Diversified Risk Parity Portfolio, (DRP), ("the Fund") seeks to achieve superior risk adjusted returns by replicating the return streams found within a global hedge fund strategy. Within that framework DRP seeks risk factor neutrality within three major risk factors: Economic Growth, Inflation, and Risk.

In an effort to move the hedge fund allocation toward risk factor balance, we feel it is important to shift the risk exposure of the portfolio from those areas where the general hedge fund allocation creates an outsized exposure to certain economic factors. This risk can then be reallocated into those environments where the portfolio lacks material exposure.

For example, the HFRI Fund of Funds index's largest sensitivity is to rising growth and risk seeking environments with less protection during the opposite conditions or to rising inflation. In an effort to gain meaningful exposure to these factors, we believe that an investment in the Diversified Risk Parity Portfolio can make a material change in a portfolio's overall risk profile. In addition to providing a compelling risk reward profile, the Fund maintains a highly liquid portfolio, offering daily liquidity.

Return Distributions

Important Information

Past performance is not a guide to future results. Performance reflects the reinvestment of dividends, is net of portfolio-level fees/expenses but not sales charges which will reduce returns and reflects deduction of performance allocation as if payable monthly not quarterly. Performance may be volatile and the portfolio will fluctuate. Investors may not receive the full amount invested upon redemption. **Indexes** listed do not represent benchmarks for DRP, but allow for comparison of DRP's performance to an index. An investor cannot invest directly in an index. Index performance does not reflect fees and expenses. Investments are speculative and involve **Risk**. Portfolio risks include: dependence on the performance of underlying managers; DRP's ability to allocate assets; expenses at DRP and underlying fund; limited transparency with respect to the holdings in portfolio funds; and portfolio funds are generally not subject to any comprehensive regulatory scheme. Risks of underlying funds include, among others, leverage, options, derivatives, distressed securities, futures, and short sales, and investments in small, mid cap, fixed income, illiquid, emerging and developed market securities or specific sectors. Exchange rate fluctuations may affect returns. Allocations and holdings are subject to change. There is no assurance that DRP's investment objective will be attained. Incentive fees/allocations could encourage parties to make investments that are riskier or more speculative. This material is not an offer or a solicitation to subscribe for any Fund, and is not investment advice. Sales of shares are made on the basis of the offering circular only and cannot be offered in any jurisdiction in which such offer is not authorized. There is no secondary market for the investor's interest in DRP, liquidity may be limited and there are restrictions on transferring shares. Investment in DRP may not be suitable for all investors; investors should consider risks and other information in the offering circular and consult their professional advisers regarding suitability, legal, tax and economic consequences of an investment. Securities and advisory services offered through Centaurus Financial, Inc. a registered broker/dealer and a member FINRA and SIPC. This is not an offer to sell securities, which may be done only after proper delivery of a prospectus and client suitability is reviewed and determined. Information relating to securities is intended for use by individuals residing in TX. RAM Financial Group is independent of Centaurus Financial, Inc.
