

Diversified Risk Parity Portfolio

January-31-2011

Multi-strategy, multi-manager, diversified exposure to global financial markets

Investment Highlights

- » The DRP¹ strategy offers exposure to the alternative investment space with lower risk and less volatility than most traditional equity investment returns.
- » Over time, alternative investments have produced returns that are significantly less correlated to traditional investments. This is particularly beneficial in down markets.
- » The goal of the Diversified Risk Parity Portfolio is to seek to compound returns as frequently as possible.

Diversified Risk Parity Portfolio

January-31-2011

Manager's Commentary

Hedge fund performance was mixed in January as the HFRI Fund of Hedge Funds index was -0.27%. With emerging market managers, equity long/short, and macro managers flat to down on the margin, domestic event driven and late stage distressed performed very well. The end result for DRP was mixed as well, but for different reasons. Our hedge fund book and trading books both produced solid gains, however, our metals positions dragged us to a slightly negative number of -0.14%. Now, while we draft this months commentary, our metals position has rebounded and all three legs of our portfolio are doing well, it is worth looking at why we have such a strong metals position.

We believe markets are a bit distorted and one example of that is the US bond market where QE2 has permitted the Federal Reserve to pass China as the largest owner of US Treasuries. It is estimated that the Fed will own roughly \$1.6 trillion in Treasuries by the end of June when QE2 ends (almost 2x China's position). This is balance sheet expansion which is what Gold is most correlated to... even more than inflation. Keep in mind, the quarterly correlation is higher than the monthly correlation, so months like January are not a surprise. For DRP, while the balance sheet expands, we will keep the exposure to our metals book. And while investors have begun 2011 with a sense of calm, events in Egypt and Tunisia are only going to require more liquidity to be created, not to mention the issues Ireland, Spain and Portugal face.

So, while some are sanguine with the massive beta rip in the S&P 500 today, we believe the headwinds the markets face from here are not insignificant, and investors are better served in hedged strategies that can provide protection should public policy change quickly. As always, please do not hesitate to call with any questions. (512) 327-6000.

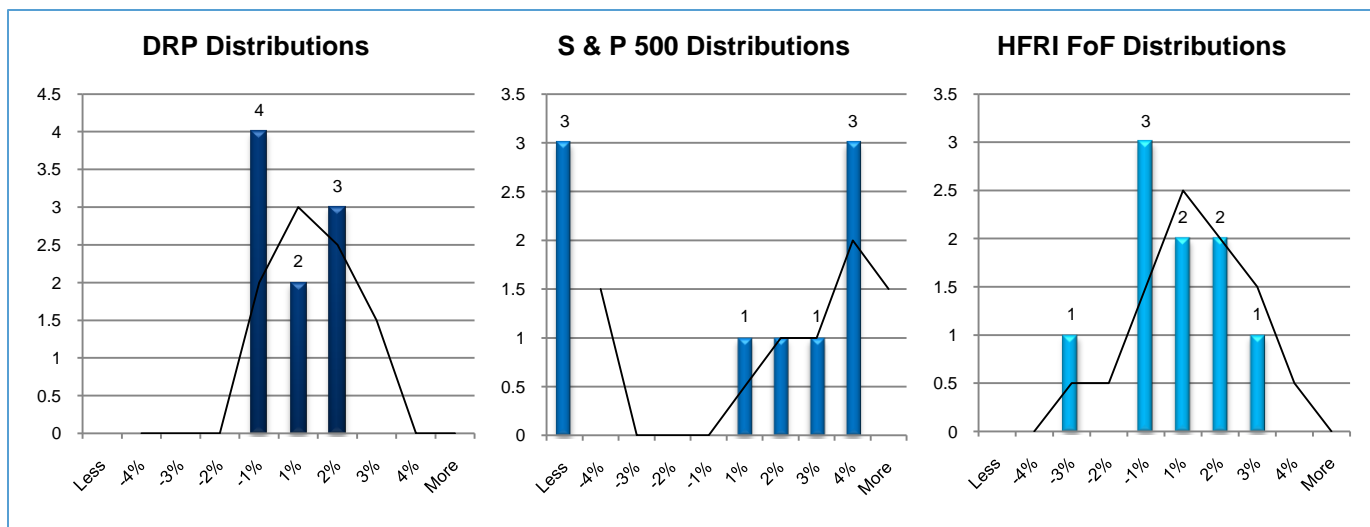

DRP Strategy Development

Diversified Risk Parity Portfolio, (DRP), ("the Fund") seeks to achieve superior risk adjusted returns by replicating the return streams found within a global hedge fund strategy. Within that framework DRP seeks risk factor neutrality within three major risk factors: Economic Growth, Inflation, and Risk.

In an effort to move the hedge fund allocation toward risk factor balance, we feel it is important to shift the risk exposure of the portfolio from those areas where the general hedge fund allocation creates an outsized exposure to certain economic factors. This risk can then be reallocated into those environments where the portfolio lacks material exposure.

For example, the HFRI Fund of Funds index's largest sensitivity is to rising growth and risk seeking environments with less protection during the opposite conditions or to rising inflation. In an effort to gain meaningful exposure to these factors, we believe that an investment in the Diversified Risk Parity Portfolio can make a material change in a portfolio's overall risk profile. In addition to providing a compelling risk reward profile, the Fund maintains a highly liquid portfolio, offering daily liquidity.

Return Distributions

Important Information

Past performance is not a guide to future results. Performance reflects the reinvestment of dividends, is net of portfolio-level fees/expenses but not sales charges which will reduce returns and reflects deduction of performance allocation as if payable monthly not quarterly. Performance may be volatile and the portfolio will fluctuate. Investors may not receive the full amount invested upon redemption. **Indexes** listed do not represent benchmarks for DRP, but allow for comparison of DRP's performance to an index. An investor cannot invest directly in an index. Index performance does not reflect fees and expenses. Investments are speculative and involve **Risk**. Portfolio risks include: dependence on the performance of underlying managers; DRP's ability to allocate assets; expenses at DRP and underlying fund; limited transparency with respect to the holdings in portfolio funds; and portfolio funds are generally not subject to any comprehensive regulatory scheme. Risks of underlying funds include, among others, leverage, options, derivatives, distressed securities, futures, and short sales, and investments in small, mid cap, fixed income, illiquid, emerging and developed market securities or specific sectors. Exchange rate fluctuations may affect returns. Allocations and holdings are subject to change. There is no assurance that DRP's investment objective will be attained. Incentive fees/allocations could encourage parties to make investments that are riskier or more speculative. This material is not an offer or a solicitation to subscribe for any Fund, and is not investment advice. Sales of shares are made on the basis of the offering circular only and cannot be offered in any jurisdiction in which such offer is not authorized. There is no secondary market for the investor's interest in DRP, liquidity may be limited and there are restrictions on transferring shares. Investment in DRP may not be suitable for all investors; investors should consider risks and other information in the offering circular and consult their professional advisers regarding suitability, legal, tax and economic consequences of an investment. Securities and advisory services offered through Centaurus Financial, Inc. a registered broker/dealer and a member FINRA and SIPC. This is not an offer to sell securities, which may be done only after proper delivery of a prospectus and client suitability is reviewed and determined.
